Clamps for horizontal lifting in pairs

Product information

The horizontal plate clamp is designed for the safe lifting and handling of steel plates and other plate materials when used in pairs. The clamp grips the edge of the plate securely, ensuring stable handling in production facilities, warehouses, and various metalworking applications. The clamps must always be used in pairs and are designed to lift one plate at a time.

Especially suitable for

- Horizontal lifting of steel plates
- Handling plate materials in production and warehouse environments
- Lifting and material handling applications in the metalworking industry

Product features

- Designed for horizontal lifting of plates (one plate at a time) when used in pairs
- Securely grips the edge of the plate
- Durable construction for professional use
