The Safe Cold partition walls system

Product information

The Safe Cold partition wall system is based on a patented fastning device that makes it totally independent of other devices inside the box. The partition wall is made of recyclable material and is free from Freon. The isolation material in the Safe Cold partition have Thermal Conductivity value 0,034W/mK. The wall is only 40 mm in thickness, which make it take minimum space at loading and unloading.

The Safe Cold partition system is flexible and allows personalized solutions, such as mini cold rooms. The wheight of Safe Cold is appr. 10 kg/m?. The partition wall is made in 3-sections. The height of this model is 2800 mm and has loose top lath. This is for you yourself to be able to cut down this according to your own needs. For the higher models we recommend 3-section for lighter weight per section, and the advantage that each section then can be placed between the load beams in a double decking vehicle, when the partition wall system not are in use.
